Professional Summary

Backend & AI Engineer with 3+ years of experience building production-grade AI applications, scalable backend systems, and LLM-powered solutions. Experienced in FastAPI, Python, LiveKit, LangChain, LangGraph, PostgreSQL, Redis, Docker, and Azure. Passionate about designing low-latency AI systems, Retrieval-Augmented Generation (RAG) platforms, and intelligent automation solutions.

Skills

Languages: Python, Go, JavaScript, TypeScript, SQL

Backend: FastAPI, REST APIs, WebSockets, Async, Microservices, OAuth2

AI / LLMs: LLMs, OpenAI API, RAG, LangChain, LangGraph, AI Agents, Prompt Engineering

Databases: PostgreSQL, MongoDB, Redis, MySQL, Oracle, SQL Server, pgvector

Cloud & DevOps: Docker, Docker Compose, RabbitMQ, Celery, Linux, Git, GitHub, CI/CD, Azure, AWS

Work Experience

PharynxAI, Noida

Jun 2024 – Present

Software Developer

- Designed and developed production-grade FastAPI microservices powering AI applications, real-time backend services, and OpenAI-driven automation workflows.
- Engineered real-time AI Voice Agents using LiveKit and LLMs, delivering scalable, low-latency conversational experiences.
- Built enterprise RAG pipelines and asynchronous processing systems using LangChain, Redis, and RabbitMQ for intelligent document retrieval and workflow automation.
- Improved system scalability and deployment reliability through backend optimization, Docker containerization, and Linux-based production deployments.

STJ Electronics Pvt. Ltd.

Oct 2022 – Jun 2024

Database & Software Engineer

- Designed and optimized Oracle and SQL Server databases.
- Developed complex SQL queries, ETL processes, and reporting solutions.
- Implemented backup, recovery, and database optimization strategies.
- Integrated enterprise databases with backend applications.

Education

Sangai International University

Aug 2019 – Jun 2022

B.Tech in Computer Science and Engineering

CGPA: 6.9/10

Selected Projects

- Real-Time AI Call Agent:** Engineered a production-ready AI call agent with enhanced backchannel handling and cost-optimized AI inference, enabling natural, low-latency real-time voice conversations.
- Enterprise RAG Platform:** Developed an enterprise Retrieval-Augmented Generation (RAG) platform using FastAPI, LangChain, LangGraph, PostgreSQL (pgvector), and OpenAI to enable intelligent document ingestion, semantic search, and context-aware conversational AI.
- AI Resume & JD Matching:** Developed an LLM-powered Resume-to-JD matching system that semantically analyzed resumes and job descriptions to automate candidate ranking and improve recruitment efficiency.
- AI Email Processing System:** Developed an AI-powered email processing system that automatically classified resumes and job descriptions, detected duplicates, and extracted structured information using LLMs.
